DETAILED ACTION

Upon further consideration of the specification and along with Applicants arguments, restriction requirement is reformulated as follows:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 13-19, drawn to a method of treating a disorder of the pilosebaceous apparatus of a mammal, comprising administering an insulin sensitivity increasing substance (i.e. biguanide), classified in class 514, subclass 635.
- II. Claims 1-4, 7-11, 13-19, drawn to a method of treating a disorder of the pilosebaceous apparatus of a mammal, comprising administering an insulin sensitivity increasing substance (i.e. thiazolidinedione), classified in class 514, subclass 439.
- III. Claims 1-4, 7-8, 12-19, drawn to a method of treating a disorder of the pilosebaceous apparatus of a mammal, comprising administering an insulin sensitivity increasing substance (i.e. D-chiro-inositol), classified in class 514, subclass 738.

Art Unit: 1617

- IV. Claims 20-22, 26-30, drawn to a composition for treating a disorder of the pilosebaceous apparatus of a mammal, said composition comprising an ISIS (i.e. thiazolidinedione), classified in class 514, subclass 439.
- V. Claims 20, 23,24, 26-30, drawn to a composition for treating a disorder of the pilosebaceous apparatus of a mammal, said composition comprising an ISIS (i.e.biguanide), classified in class 514, subclass 635.
- VI. Claims 20, 25-30, drawn to a composition for treating a disorder of the pilosebaceous apparatus of a mammal, said composition comprising an ISIS (i.e.D-chiro-inositol), classified in class 514, subclass 738.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I-III and IV-VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product since the product has been use to treat diabetes mellitus.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and acquired a separate status in the art as shown by their different classification, and the required non-patent

Art Unit: 1617

literature search is not co-extensive. Therefore, restriction for examination purposes as indicated is proper.

Inventions Group I and Groups II-III are independent and distinct each from the other due to separate classification. Therefore, the searches and variation in the use of the claimed active agents renders the claims separate and distinct inventions. The searches as stated above are not co-extensive, particularly in the required literature search. Therefore, restriction for examination purposes is proper.

Inventions Group IV and Groups V-VI are independent and distinct each from the other due to separate classification. Therefore, the searches and variation in the composition of the claimed active agents renders the claims separate and distinct inventions. The searches as stated above are not co-extensive, particularly in the required literature search. Therefore, restriction for examination purposes is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1617

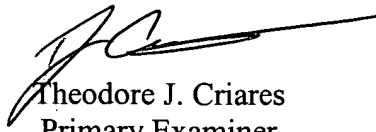

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

No telephone communication was made on this restriction requirement because the restriction is complex. (MPEP 812.01).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer Kim whose telephone number is 703-308-2232. The examiner can normally be reached on Monday through Friday 8:30am to 5pm.
